

ALUMINIUM

FOR THE PERFECT FINISH

THE PREMIER SOURCE FOR SOLAR GROUND MOUNTING SYSTEM

SOLAR GROUND MOUNTING SYSTEM & INSTALLATION GUIDE

CHARACTERISTICS OF ALUMINIUM

- » Non corrosive
- » Lightweight yet durable
- » Non-magnetic
- » Good heat and electrical conductor
- » Alloy formability
- » Machinability
- » Recyclability

THE ECO-FRIENDLY METAL

Aluminium is one of the top green metals that is widely used in many industries. This eco-friendly metal is the most recyclable industrial metal that does not lose its mechanical and physical characteristics. Of course, aluminium can be recycled infinite times! The world has produced 1 billion tons of aluminium in the last 100 years and the world still consumes 75% of what's been produced in the last century. Why? Aluminium is a recyclable metal and requires only 5% of the energy required in the original Aluminium Production from its raw state.

ALUMINIUM IS THE MATERIAL FOR THE FUTURE!

SWISSTEK SOLAR GROUND MOUNTING SYSTEM

As a reliable Solar Ground Mounting System Manufacturer, Swisstek provides a diverse line of Ground Mount solutions to meet your requirements. All our Ground Mount products are made of High-Quality Aluminium alloys with excellent system performance and reliability. With our team's extensive knowledge in the industry, we consider real-life usage ensuring all products are made to stringent international standards. What makes our ground mounts the best choice in the market? We utilize only high-end Aluminium alloys & materials that have a resistance against corrosion. Meanwhile you enjoy our long-lasting components, you also benefit from the competitive pricing on our ground mount system.

SWISSTEK SOLAR GROUND MOUNTING SYSTEM SPECIFICATIONS & FEATURES

SPECIFICATIONS

- » **Material** - Aluminium 6082-T6 (For structure)
Stainless Steel 304 (For fasteners)
- » **Mounting types** - Portrait and landscape ground mounting structures for PV array
- » **Applicable sites** - Open ground
- » **Wind load** - Up to 60 m/s
- » **Ground clearance** - Customized
- » **Warranty** - 10 years

FEATURES

- » T-clamp provides easy connection
- » Fast installation
- » Wide spans between legs, minimizing the requirement of rafter and anchors
- » Withstand for high winds
- » Verified with finite element analysis and fail test

SWISSTEK SOLAR GROUND MOUNTING PROFILE DETAILS

Profile Code - SM 5504
Linear Weight - 0.687 kg/m

Profile Code - GS 1004
Linear Weight - 0.678 kg/m

Profile Code - SM 5505
Linear Weight - 0.399 kg/m

Profile Code - GS 1002
Linear Weight - 1.160 kg/m

Profile Code - GS 1005
Linear Weight - 0.389 kg/m

Profile Code - GS 1007
Linear Weight - 1.509 kg/m

Profile Code - GS 1001
Linear Weight - 6.351 kg/m

Profile Code - GS 1006
Linear Weight - 3.239 kg/m

Profile Code - GS 1010
Linear Weight - 1.238 kg/m

Profile Code - GS 1011
Linear Weight - 0.827 kg/m

Profile Code - SM 5506
Linear Weight - 0.284 kg/m

Profile Code - SM 5505
Linear Weight - 0.399 kg/m

Profile Code - GS 1009
Linear Weight - 0.879 kg/m

Profile Code - GS 1008
Linear Weight - 1.314 kg/m

OVERVIEW OF LANDSCAPE GROUND MOUNTING SYSTEM

TECHNICAL INFORMATION

PV module orientation	-	Landscape	01.	SGM Landscape Purlin
Installation site	-	Open field	02.	SGM Landscape Purlin Connector
Wind load	-	Up to 60m/s	03.	SGM Rail Clamp
Applicable module	-	With frame/frame less	04.	T Clamp
Foundation	-	Concrete/Ground screw	05.	Angle Clamp
Structural material	-	6082 - T6	06.	SGM Rafter
Surface finish	-	Natural Anodized (customizable)	07.	SGM Top Base
Fastener material	-	Stainless Steel 304	08.	SGM Front Leg
Main material	-	100% Anodized Aluminum	09.	SGM Diagonal Beam
Warranty	-	Ten years warranty	10.	SGM Bottom Base

INSTALLATION MANUAL

SAFETY INSTRUCTIONS

- » Use of Personal Protective equipment (PPE) during the installation is a must.
- » Keep the presence of second party to help in the event of an accident throughout the installation process.
- » Do not remove any safety devices.
- » Keep a copy of the installation guide throughout the installation process.
- » Comply with the local safety regulations.
- » Intended to be used by individuals with sufficient technical skills for the task.
- » Installer should have the knowledge of the use of hand tools, Power tools and measuring devices.
- » Keep the precaution notes to assist in the assembly process to keep the attention for certain operations during the assembly process which could cause serious personal injuries or/and damage the components.

GENERAL INSTRUCTIONS

- » Make sure the installation instructions and safety instruction are read and understood by the installer.
- » Make sure the installation is carried out by the personals with specialist technical knowledge and basics of mechanical engineering.
- » Do not remove any safety devices.
- » Keep a copy of the installation guide throughout the installation process.
- » Comply with the local safety regulations.
- » Intended to be used by individuals with sufficient technical skills for the task.
- » Installer should have the knowledge of the use of hand tools, Power tools and measuring devices.
- » Keep the precaution notes to assist in the assembly process to keep the attention for certain operations during the assembly process which could cause serious personal injuries or/and damage the components.

WARRANTY

Swisstek provides a warranty of 10 years for the service life for all materials used.

LAYOUT PLANNING

A general layout drawing is provided for all the systems before delivery.

Following drawings shows an example of the layout drawing for typical landscape PV array.

Landscape front view solar panel

Landscape front side solar panel

INSTALLATION TYPES

'N' Type
Fit for over 600 mm

'A' Type
Fit for height of 300 mm less

'W' Type
Fit for long placement

'Non-foot' Type
Fit for hill

Concrete column

Top connection

FOUNDATION

There are two main options for swisstek solar ground mounting system.

1. Concrete foundation
2. Ground screw piling

CONCRETE FOUNDATION

In most of the cases concrete foundation would be ideal. Consult a structural engineer to determine exact type & size of the foundation by observing the land location and soil status.

GROUND SCREW PILING

Use ground screw piles with the consultation of a structural engineer with soil test reports. Product is attached for the reference.

INSTALLATION TOOLS

Allen Key for M8 Bolt

Coach Wrench
(for M10-M12 Hex Bolts)

Power Tool

Torque Wrench

Drill Bit for Power Tool
(5mm)

Tape Measure

Power Tool Bit For Hex Bolt
M10 and M12

Rope

Rubber Hammer

INSTALLATION STEPS

Step 1 - Insert SGM holding top base (80mm and/or 130mm) in to the rail of SGM rafter.

Step 2 - Fix the legs and SGM diagonal beam to the SGM holding top base.
Adjust the SGM holding top bases according to the given measurements along the rafter.

Step 3 - Fix the SGM bottom base on the foundation according to the given drawing measurements.

Step 4 - Fix the assembled SGM rafter assembly on the SGM bottom base.

Step 5 - Crosscheck the dimensions with the drawings.

Step 6 - If the measurements are correct repeat Step 3. along the foundation.

Step 7 - Repeat Step 4

Step 8 - Place SGM purlins over the rafters according to the given measurements.

Step 9 - Insert SGM angle clamps in the edge purlins and SGM T clamps in the middle purlins.

Step 10 - Place the Solar panel on the purlins and fix it with SGM angle clamp and/or SGM T clamp.

Step 11 - Repeat the step until structure is covered with solar panels.
